

R-Farm HK CSA; Subscription Form

A- PRINCIPLES

R-Farm HK is a Regenerative Agriculture enterprise operating out of Tsat Sing Kong, Yuen Long District, Hong Kong.

The aim of the farm is to grow vegetables for the wider HK community following principles of ecological and social regeneration. The output is seasonal organic crops that are not only flavourful, but also highly nutritious and clean (devoid of harmful chemicals).

R-Farm HK operates on two fronts with regards to the distribution of vegetables:

- 1- Community Shared Agriculture, or CSA. This model will account for 70% or more of the total output of the farm.
- 2- Distribution (for free or at very low cost) of the remaining of the production to low income families in the district and beyond.

B- SUBSCRIPTION TO CSA

Two baskets of weekly seasonal vegetables are provided by R-Farm HK, one of 4 kg (enough for a family of 4 pax for 4-5 days) and one of 6 kg (for big vegetables eaters).

The subscription period is for 13 weeks (3 months), renewable at discretion. Payment of the subscription is in advance. The subscription will effectively start upon a- payment of the fee and b- distribution of the first vegetable basket to the subscriber.

The composition of the basket will vary according to seasons and the crop plan of the farm; it shall contain minimally four different vegetables from the list appended to this subscription form. This list may be modified from time to time.

BASKET	SUBSCRIPTION FEE (HK\$)	
Small (4 kg)	4,300	<input type="checkbox"/>
Large (6 kg)	6,000	<input type="checkbox"/>

Please tick the box for your choice

Vegetables can be picked up at the farm (preferred) or delivered. Delivery point will be dependent on the geographic location of all subscribers (in order to minimise time and costs) and shall be agreed upon at a later date. We encourage you to visit us regularly as in essence the CSA model makes you a stakeholder of the enterprise.

Feedback from your experience is welcomed and expected.
